January 19, 2011

SUBJECT: Commercial Laboratory Suitability Status, MIL-STD-883, FSC 5962 and MIL-STD-750, FSC 5961

Mr. Daniel Rossiter
Oneida Research Services, Inc.
8282 Halsey Road
Whitesboro, NY 13492

Dear Mr. Rossiter:

As a result of our audit during the week of August 2, 2010, your facility at the above address is considered suitably equipped to perform testing on military devices for the following test methods of MIL-STD-883:

<u>TEST</u>	<u>METHOD</u>	<u>CONDITION</u>
Seal	1014	B1, B2 and B1/B2
Radiography	2012	Non-Film (Digital) and Film
SEM	2018	N/A
PIND	2020	A, B
Internal Water-Vapor Content	1018	N/A

In addition, your facility is considered suitably equipped to perform testing on military devices for the following test methods of MIL-STD-750:

<u>TEST</u>	<u>METHOD</u>	<u>CONDITION</u>
Seal	1071	A1, G1, G2, and G1/G2
Radiography	2076	Non-Film (Digital) and Film
SEM	2077	N/A
PIND	2052	A, B
Internal Water-Vapor Content	1018	N/A

This suitability for test method 1018 for both MIL-STD-883 and MIL-STD-750 is limited to the internal gas analysis machines with serial numbers EQ-01-015 and EQ-06-009. This suitability is limited to volumes greater than or equal to 0.01 cm³ for EQ-01-015 and to volumes greater than or equal to 0.001 cm³ for EQ-06-009 for MIL-STD-883 and for MIL-STD-750 tests.

This suitability is valid until terminated by written notification from the office of primary interest (OPI), qualifying activity. Your laboratory may be re-audited on a drop-in basis and commercial laboratory suitability may be withdrawn by this Center at any time.

This suitability prohibits your company from removing or altering the device marking. Any device that fails testing conditions shall be identified (isolated) as a reject and returned to the device manufacturer for verification of failure mode or the device(s) shall be destroyed with manufacturer approval under government witness.

The approved test methods and procedures shall be used for all military testing. Any time the test method is specified in a contract or purchase order, etc., you must comply fully with the specified test method. Whenever the military standard is specified, the testing must be performed in accordance with the DLA Land and Maritime approved procedure, to all the military standard requirements, and in accordance with what was demonstrated

during the DLA Land and Maritime audit. Any exceptions to the DLA Land and Maritime approved test method must be clearly stated in the contract. However, under no circumstances can changes, exceptions, waivers, etc., be applied when a test is done on a QPL or QML product unless the test method is officially amended or revised by the preparing activity of the military document.

Electrostatic discharge sensitivity (ESDS) requirements are enforced by this Center. Therefore, all hybrid/monolithic electronic devices will be handled as ESD sensitive (category 1), unless otherwise notified by the device manufacturer. Consequently, all processing procedures will incorporate the handling, testing, and packaging requirements according to the guidelines in MIL-HDBK-263 and JESD625.

To maintain laboratory suitability status for the above listed test methods, you are required to compile a summary of all hybrid/monolithic electronic devices tested to the requirements of the above test methods. This summary and other information described below shall be submitted every twelve months.

Your standard reporting period will include work performed from **July 1** through **June 30**. Your next retention report shall be submitted to DLA Land and Maritime by July 31, 2011. The retention report shall include the items in section IV of DLA Land and Maritime's Laboratory Suitability Information booklet.

The use of your laboratory for performing testing is subject to conditions stated in 4120.24-M and SD-6.

If you have any questions, please contact Mr. Alan Barone at (614) 692-0510.

Sincerely,

RAYMOND KOLONCHUK
Chief
Electronic Devices Branch
